Sandata Mobile Connect

iOS and Android Global Release
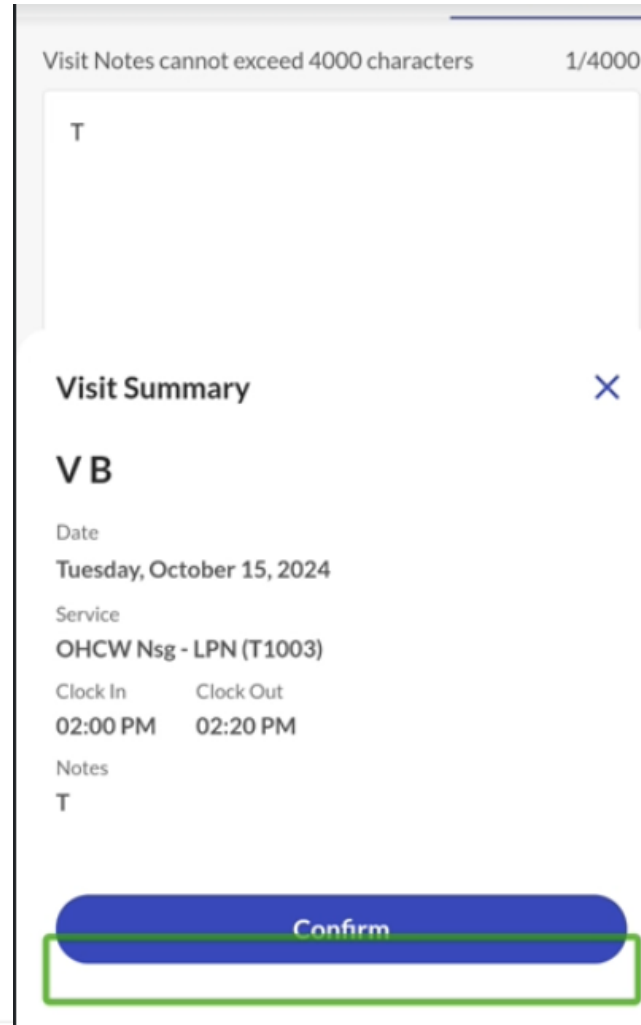

Date: December 12, 2024

Faride Beaubien, Product Management

VC-1461: SMC ADA - Focus should not be able to move behind modals

▸ Both iOS and Android

▸ **ISSUE**: When the user executes any action that spawns a popover, drawer or modal, focus should not be able to reach items that are behind it.

- o Start unknown visit modal
- o Select a service popover
- o Select a location popover
- o Visit Summary popover
- o Recipient Verification modal

▸ **FIX**: Focus will only select what is visually available to user

VC-1698: Front end pop to prevent users from logging in frequently

ISSUE

▸ Both iOS and Android

▸ If SMC user attempts to login multiple times without logging out properly, the user will receive an unclear message
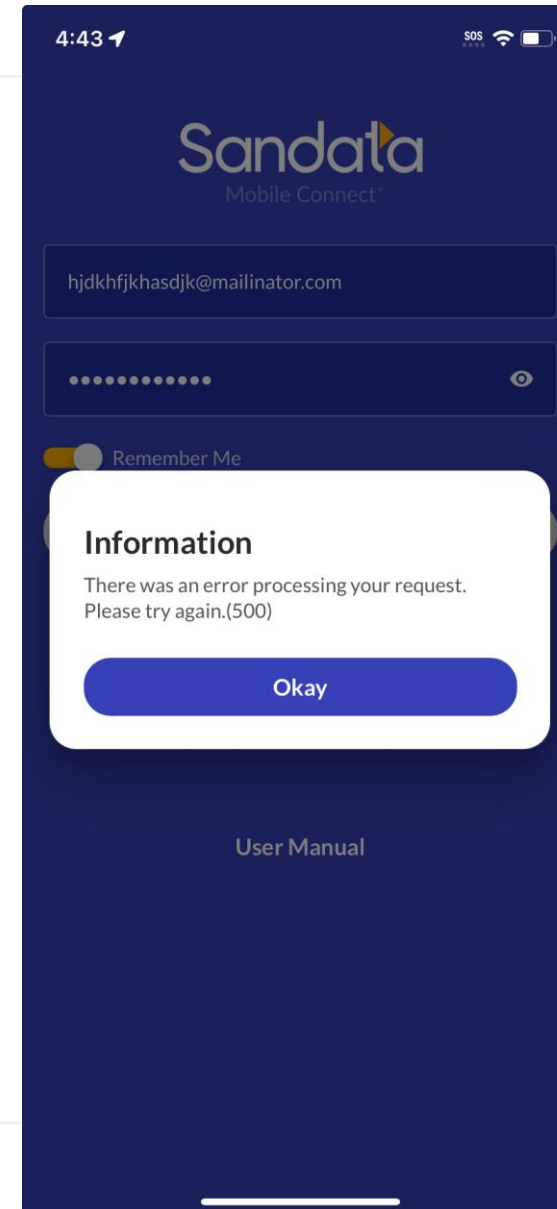

▸ Unclear message caused more failed attempts at logging in

# VC-1698: Front end pop to prevent users from logging in frequently

FIX

▸ Both iOS and Android

▸ If an SMC user attempts to login multiple times without logging out properly, the user will receive a clearer message

▸ Message: "You recently logged in on another device. Please try again after 2 mins."

VC-1710: SMC capturing GPS coordinates

ISSUE: Do not capture GPS coordinates if user changes device or app level permissions manually and logs into the app without quitting in the background

- Android and iOS
- Previous requirement to cache GPS coordinates in event there was a loss of signal

FIX:

- Location Services shall only be managed by the phone or SMC app level settings.
- Device settings will supersede SMC app settings. Location Services must be ON for any GPS coordinates to be captured AND SMC location permission must be granted.
- If user changes settings amidst a visit, do not capture GPS settings and ensure changes to settings are honored.
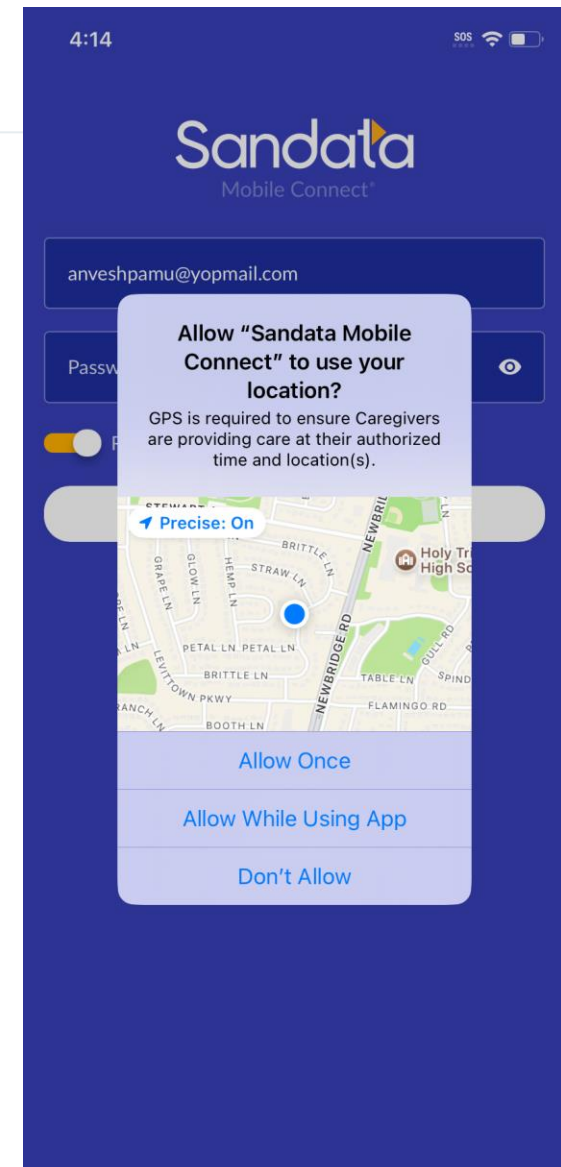

VC-1710: SMC capturing GPS coordinates

Scenario: Phone Location Services OFF; SMC Location Permission Changed ON -->OFF

▸ Turn on Location Services for device and allow location access to the SMC app

▸ Login and start any type of visit

▸ Go to device settings and change app location permissions to "Never" - Do not quit app

▸ Login and finish the visit
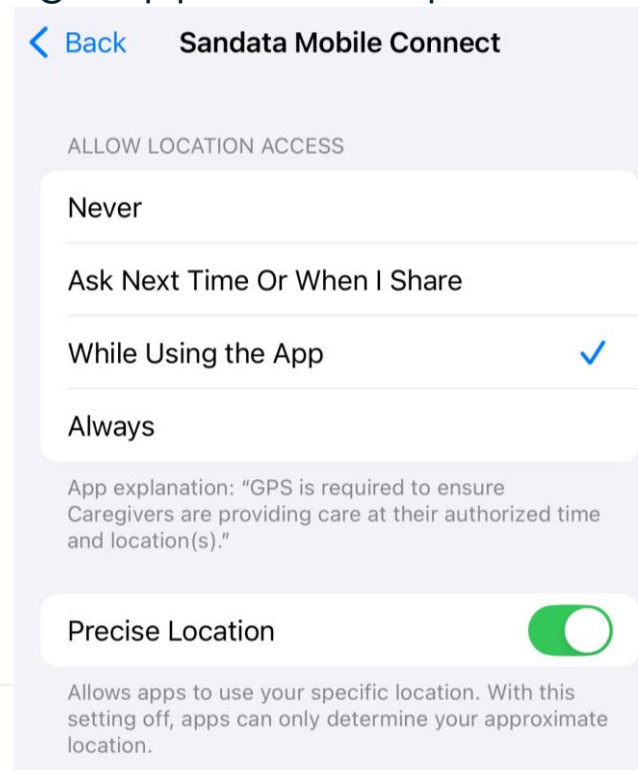

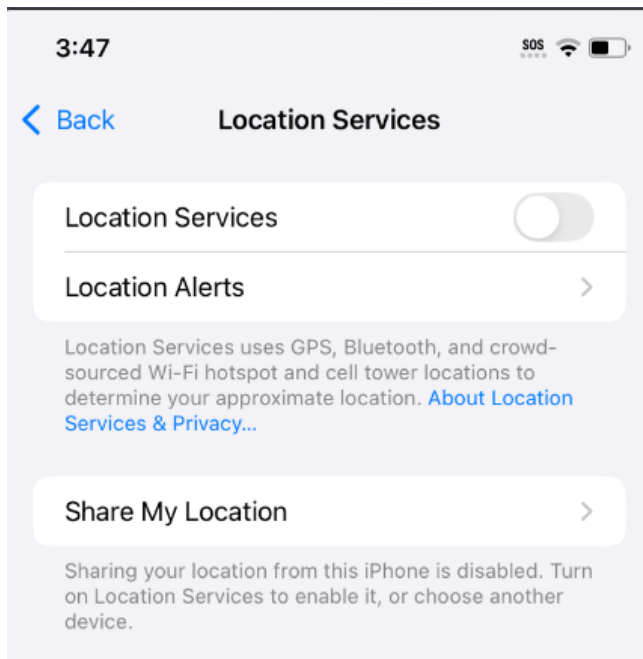

VC-1713 Update SMC Language Chinese Options

▸ Both iOS and Android

▸ **ISSUE**: Existing labels for Chinese are mislabeled with the formal name instead of the written name

▸ **FIX**:
- Chinese (Mandarin) 普通話 -> Simplified Chinese (translation pending)
- Chinese (Cantonese) 粵語 -> Traditional Chinese (translation pending)

Date: December 11, 2024

Sean Dunham, Product Management

HOM-7665: Add Payer, Program and Relationship to XREF Search Grid

▶ **ISSUE**: For Live-In Caregivers, there is a need to identify the payer, program and relationship when setting up XREF

- o Payer
- o Program
- o Live-In Caregiver Relationship

▶ **FIX**: The added columns will be displayed in the search results grid for the XREF module
